DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-7, 10, 12-16, 20, 22-24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Neuteboom et al. "a DSP-Based Hearing Instrument IC", IEEE Journal of Solid States Circuits, Vol. 32, No. 11, pp. 1790-1806, November 1997. See figure 4, and the corresponding pages of the specification.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 2838

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim2, 8, 9, 11, 17-19 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Neuteboom et al. "a DSP-Based Hearing Instrument IC", IEEE Journal of Solid States Circuits, Vol. 32, No. 11, pp. 1790-1806, November 1997 in view of Can (USP 6,016,051).

Neuteboom et al. discloses the claimed invention except for the use of a bias current source. Can discloses that it is known in the art to provide the use of a bias current source. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the use of bias current of Can with the low voltage supply of the bandgap circuit of Neuteboom, in order to make the circuit more adjustable to changing circuit conditions.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art discloses the state of the art in the field of bandgap reference circuitry.
